Why Twist Interior Design?

We think of design as the transformation of your vision into an environment that represents the vitality of your lifestyle. Equally at home with contemporary styles and more traditional approaches, we draw from a palette as diverse as the people we serve. And to assure faultless quality, we collaborate with the most talented architects, contractors, craftsmen and artists.

What is your philosophy?

Quality of communication and collaboration are essential to great design. But the true standard of success is that the client has fun—because when the process is a pleasure, the results are almost guaranteed to be great.

Every home needs...

Every home needs a soul. Whether you love clutter, or instead want a visual break from the hectic pace of everyday life, there's a way to create a spirit in your home that nourishes your need to relax and renew. Have Twist Interior Design help you decide what the most important elements are in your environment—color, texture, lighting, millwork, artwork, whatever! Then focus on the goal of achieving those design solutions.

SHELTER SAVVY "Take your time. Your home is a place to build your memories. That means giving yourself time to acquire accessories and artwork that are meaningful and reflect the events of your life, big or small."

—SANDY LAMENDOLA, ASID, TWIST INTERIOR DESIGN
